Challenges in the Biosciences Image Analysis and Pattern Recognition Aspects

The 32nd annual workshop of the Austrian Association for Pattern Recognition ([OAGM/AAPR](#)) provides a platform for researchers in the fields of Image Analysis, Image Processing, and Pattern Recognition to discuss important topics of the computer vision discipline. It is organized in workshop form presenting the latest work of both Austrian and international institutes.

Theme of the 32nd workshop is "Challenges in the Biosciences: Image Analysis and Pattern Recognition Aspects".

We cordially welcome submissions in these fields, as we plan a dedicated session to these topics. Further topics relate to all aspects covered by the OAGM/AAPR community: image analysis & processing, and pattern recognition. They traditionally include, but are not limited to:

- image acquisition,
- image / video processing and analysis,
- color imaging,
- image databases,
- image synthesis,
- digital rights protection,
- motion analysis and tracking,
- interactive systems,
- reconstruction from multiple views,
- view registration,
- mixed-reality applications,
- other

Confirmed Invited Speakers:

Paper Review:

The paper page limit is 12 (submission and camera ready).

Papers have to be written in English. Formatting instructions and templates are available on the web page. The paper has to be submitted electronically via the web page starting by 10. Jan. 2008.

Submission and presentation of a similar paper at another international conference is no reason for rejection. Please consider the strict submission deadline.

Accepted papers based on 3 independent reviews have to be presented orally or as poster. Proceedings are intended to be published as OCG workshop proceedings (<http://www.ocg.at>).
