PostDoc position (f/m) (100%, 40 hours/week)  
in the Inverse Problems and Mathematical Imaging Group

At the Johann Radon Institute for Computational and Applied Mathematics (RICAM) of the Austrian Academy of Sciences, Linz, Austria, the “Inverse Problems and Imaging Group” is searching a PostDoc with a strong background in Tomography or Regularization. The research focus will be adjusted according to the interests of the successful candidate, although expert knowledge in either one of the following topics Mathematical Tomography, Integral Geometry, Regularization Theory, Stability Estimates is preferential.

A doctorate in mathematics or a closely related field is required. The working language is English. For more information contact Prof. O. Scherzer at: otmar.scherzer@univie.ac.at

RICAM went into operation on January 1, 2003 and has established research groups in six areas:

- Computational Methods for PDEs
- Geometry in Simulations
- Optimization and Optimal Control
- Inverse Problems and Mathematical
- Symbolic Computation
- Transfer Group

The Institute is located on the campus of the Johannes Kepler University in Linz, a city with approx. 205,000 inhabitants. Linz is located on the Danube, close to the Austrian Alps and half-way between Vienna and Salzburg. Further information is available at: www.ricam.oeaw.ac.at

Applications with personal and scientific data and a compact statement about scientific interests and achievements should be sent by May 31, 2017, by email to the address above.

The Austrian Academy of Sciences is an equal opportunity employer.

We are approaching interested candidates, prepared to exercise the aforementioned duties for a yearly gross salary of € 50,772.40 EUR. We offer a fixed-term contract for an initial period of one year (with possible extensions up to a maximum of six years). Starting date will be October 1, 2017.
